EQUIPMENTS PVT. LTD.

ABOUT US

Lean Automation is a Engineering and Automation Solution provider for industrial automation solutions. Lean Automation was established in April 2010, at Chakan Pune India.

Our area of expertise is in providing turnkey solutions for Automotive OEMs and Line Builders. Lean Automation has grown to a strength of 120+ employees, having capabilities in Process Planning, Preparing Body Shop Layout, Design, Manufacturing, Robot Simulation, Robot Programming, Line Automation with PLC programming and integration. We take pride in successfully completing the projects and meeting customer expectation in quality & timeline.

An increase of productivity, efficiency and quality, resulting in higher competitiveness among companies on the way to the future of industry. Lean automation is preferred supplier for Industrial Automation, Control and safety products. In addition to our extensive standard product line, we provide rapid product development services ranging from customization of existing products to completely customized solutions. Our team of experienced engineers is dedicated to help solve even the most demanding applications.
